

State Pediatric Medicaid and CHIP Initiatives: At-A-Glance Table

Created by the National Center for Medical Home Implementation (NCMHI) in partnership with the National Academy for State Health Policy (NASHP), this state at-a-glance table provides an overview of pediatric medical home initiatives occurring through Medicaid and the Child Health Insurance Programs (CHIP). By learning about ongoing pediatric medical home initiatives in your state, pediatric clinicians, practices, state Title V agencies, American Academy of Pediatrics chapters, and others can gain insights on how to integrate their work and coordinate efforts across multiple systems. For more information, visit www.medicalhomeinfo.org/state pages or contact medical_home@aap.org.

Alabama		View the NCMHI Alabama State Profile focusing on the Patient Care Networks of Alabama (see Health Home section for details).	Alabama Health Home State Plan Amendment	Alabama's Health Home program serves children and adult Medicaid enrollees with chronic conditions and/or serious mental illness. Improving preventive care for children is a specific goal of the program. Alabama's previous patient-centered medical home program, which provided services mainly through the Patient Care Networks of Alabama, has been combined into the Health Home program. For details about the Patient Care Networks of Alabama, view the National Center for Medical Home Implementation Alabama State Profile.	
Alaska					
Arizona					
Arkansas	X	Pediatricians participate in the Arkansas PCMH program, an initiative launched in January 2014 under the state's Health Care Payment Improvement Initiative. Participating providers will be reimbursed for certain episodes of care.			Round 1

California			California Health Home State Plan Amendment	California's Health Home program serves adults and children with chronic conditions in 11 counties. The program began in 2018.	
Colorado	X	<p>The Accountable Care Collaborative connects Medicaid beneficiaries, including children, to medical home providers, referred to as primary care medical providers (PCMPs), that contract with Regional Accountable Entities (RAEs), beginning July 2018. RAEs provide practice transformation support to PCMPs and will be increasing the proportion of payments to PCMPs that are tied to quality-based measures and shared savings.</p> <p>View the NCMHI Colorado state profile for more information about Colorado's Accountable Care Collaborative.</p>			Round 2
Connecticut	X	<p>HUSKY Health runs a PCMH program that serves children and adults. The program mandates medical home practices meet Early and Periodic Screening, Diagnosis, and Treatment (EPSDT) requirements and track certain pediatric specific measures. Connecticut also runs a Glide Path program that provides additional support to practices transforming into medical homes.</p> <p>View the NCMHI Connecticut state profile for more information on Husky Health and the Glide Path Program.</p>	Connecticut Health Home State Plan Amendment	Connecticut's Health Home program, which went into effect in October 2015, serves children and adult Medicaid enrollees with one or more serious and persistent mental health conditions.	Round 2
Delaware					Round 2
Florida					

Georgia					
Hawaii	X	Children and adult Medicaid beneficiaries in Hawaii receive medical home services through QUEST Integration managed care contract. The program requires health plans to provide appropriate access to certified nurse midwives and pediatric nurse practitioners.			
Idaho	X	The Idaho's medical home model is supported through Healthy Connections, the state's Medicaid primary care case management program. Providers receive enhanced payments based on the complexity of patients' health care needs. Children fall within the Basic Plan and children with special health care needs and serious emotional disturbance fall within the Enhanced Benefit Plan.			Round 2
Illinois	-				
Indiana					
Iowa		Iowa provides PCMH services through its two Health Home programs.	Iowa Chronic Conditions Health Home State Plan Amendment Iowa Health Home State Plan Amendment for Adults and Children with Severe and Persistent Mental Illness View the NCMHI Iowa state profile for more information about Iowa's SPA programs.	Iowa's first health home program was launched July 1, 2012 to serve children and adult Medicaid enrollees with chronic conditions. Iowa's second SPA allowed for the launch of Integrated Health Homes on July 1, 2013. This program focuses on integrating primary care and behavioral health services for children with serious emotional disturbance and adults with serious mental illness.	Round 2
Kansas					
Kentucky					

Louisiana	X	Children and adult Medicaid beneficiaries in Louisiana receive medical home services through Healthy Louisiana, the state's Medicaid managed care program. Participating practices receive assistance in achieving medical home practice changes.			
Maine	X	In the Maine PCMH Pilot, participating adult and pediatric practices are supported in their continued transformation to a more patient-centered model of care with resources such as a learning collaborative, practice coaching, and consultation with key experts.	Maine Chronic Condition Health Home State Plan Amendment	Stage A of Maine's Health Home model launched in January 2013 and uses a community care team approach to address care for children and adults with chronic conditions.	Round 1
			Maine Behavioral Health Home State Plan Amendment	Stage B, launched in January 2015, focuses on behavioral health conditions for children and adults.	
			Maine Opioid Health Home State Plan Amendment	No pediatric population focus at this time.	
Maryland			Maryland Health Home State Plan Amendment	Children and youth with Serious Emotional Disturbance have access to health home services through a Psychiatric Rehabilitation Program.	
Massachusetts	X	The Massachusetts Primary Care Payment Reform Initiative (PCPRI) gives providers more flexibility in delivering primary care and seeks to integrate behavioral health services in a PCMH model.			Round 1
Michigan	X	Managed care organizations are required to contract with medical homes, and report on the percentage of enrollees enrolled in Patient Centered Medical Homes.	Michigan Health Home State Plan Amendment	No pediatric population focus at this time.	Round 2
			Michigan Health Home State Plan Amendment for Individuals with Depression, Anxiety, and Select Chronic Health Conditions	No pediatric population focus at this time.	

Minnesota	X	Minnesota's Health Care Homes program includes payments to primary care providers for partnering with patients and families to provide higher quality care and care coordination for children and adults with chronic health conditions.	Minnesota Health Home State Plan Amendment	Minnesota health homes provide services for adults with serious and persistent mental illness and children with serious emotional disturbance.	Round 1
Mississippi					
Missouri			Missouri Community Mental Health Center Health Home State Plan Amendment	Individuals eligible for a community mental health center Health Home include children and adults with serious and persistent mental illness, those with a mental health condition and substance abuse disorder, or those with a mental health condition and/or substance abuse disorder and one other chronic condition.	
			Missouri Primary Care Practices Health Home (PCP-HH) Clinic - State Plan Amendment	No pediatric population focus at this time.	
			View the NCMHI Missouri state profile for more information about Missouri's 2703 Health Home programs.		
Montana	X	Montana medical home providers are required to report on a set of healthcare quality and performance measures annually. Measures include childhood immunizations and depression screening.			
Nebraska	X	Nebraska's multi-payer medical home pilot includes reporting on specific pediatric measures such as immunizations, developmental screening, weight screening, and asthma.			
Nevada					
New Hampshire					

New Jersey	X		New Jersey Behavioral Health Home (Children) State Plan Amendment	Health homes serve adults with serious and persistent mental illness and children with serious emotional disturbance in five counties. The program started in one county, but has expanded over time.	
New Mexico	X	Children and adult Medicaid beneficiaries receive medical home services through New Mexico's managed care plans.	CareLink New Mexico State Plan Amendment	Health homes in two rural counties serve adults with serious and persistent mental illness and children with serious emotional disturbance.	
New York	X	Adults and children are eligible for medical home services in New York. Medical home providers are measured on 23 adult and 13 pediatric quality metrics as well as 4 utilization metrics.	New York Health Home State Plan Amendment for Individuals with Chronic Behavioral and Mental Health Conditions	New York launched its Health Home program in 2012, serving individuals with multiple chronic conditions, HIV/AIDS, or serious mental illness.	Round 2
		View the NCMHI New York state profile for more information about New York's medical home program.	New York Health Home Eligibility Criteria for Children State Plan Amendment	Effective October 2016, New York established new Health Home eligibility criteria specific to children, which includes two or more chronic conditions, or one or more of the following conditions: HIV/AIDS, serious emotional disturbance, or complex trauma.	
North Carolina	X	Children and adult Medicaid beneficiaries in North Carolina receive medical home services through Community Care of North Carolina's (CCNC) regional provider networks. CCNC has begun pediatric-specific initiatives such as the Child Health Accountable Care Collaborative which provides enhanced care coordination to children with complex health conditions.	North Carolina Health Home State Plan Amendment	North Carolina's health home program is built into the state's enhanced primary care case management program. Specific qualifying conditions include, but are not limited to, asthma, diabetes, and BMI > 25.	
North Dakota					

Ohio	X	View the NCMHI Ohio state profile for more information about Ohio's medical home program.	Ohio Health Home State Plan Amendment	Health Homes provide services to adults with serious mental illness and children with serious emotional disturbance in 5 counties.	Round 2
Oklahoma	X	Under the SoonerCare Choice program, all participating children and adult Medicaid beneficiaries are assigned to a medical home. The program has specifically addressed pediatric asthma and worked to increase the number of children receiving appropriate asthma medications.	Oklahoma Health Home State Plan Amendment	Oklahoma's first State Plan Amendment covers pediatric Medicaid beneficiaries with serious emotional disturbances.	
Oregon	X	Oregon's Patient-Centered Primary Care Home (PCPCH) Program works closely with the state's Coordinated Care Organizations (CCOs) to provide integrated and coordinated care to the state's children and adult Medicaid beneficiaries. View the NCMHI Oregon state profile for more information about Oregon's CCOs.			Round 1
Pennsylvania	X	The Pennsylvania Medical Home Initiative (PA MHI) educates and supports primary care practice teams on the adoption and implementation of the medical home model. View the NCMHI Pennsylvania state profile for more information about Pennsylvania's medical home program.			
Rhode Island	X	The Chronic Care Sustainability Initiative (CSI-RI), is a multi-payer medical home initiative with the goal of providing comprehensive primary	Rhode Island Cedar Family Center Health Home State Plan Amendment	Rhode Island's first approved Health Home SPA focuses on children and youth with special health care needs served by Cedar Family Center.	Round 2

		health care for children, youths, and adults. Participating practices receive practice coaching and participate in learning collaboratives.	Rhode Island Community Mental Health Organization Health Home State Plan Amendment	No pediatric population focus at this time.	
			Rhode Island Opioid Treatment Program Health Home Services State Plan Amendment	No pediatric population focus at this time.	
			View the NCMHI Rhode Island state profile for more information about Rhode Island's health home programs.		
South Carolina	X	Under the Medical Homes Network Program, the state contracts with Care Coordination Service Organizations and provide care coordination fees to providers. Each network is evaluated on pediatric measures including EPSDT and childhood immunizations.			
South Dakota			South Dakota Health Home State Plan Amendment	No pediatric population focus at this time.	
Tennessee	X	View the NCMHI Tennessee state profile for more information about Tennessee's PCMH initiatives.	Tennessee Health Home State Plan Amendment	Tennessee's health home program serves adults with serious mental illness and children with serious emotional disturbance. The program is delivered through the state's existing managed care organizations, and began in 2017.	Round 2
Texas		View the NCMHI Texas state profile for more information about Texas' STAR Kids managed care program.			
Utah					
Vermont	X	Vermont's medical home program uses community health teams to provide care coordination services to children and adults. Participating pediatricians have access to practice support through the Vermont Child Health Improvement Program.	Vermont Health Home State Plan Amendment	No pediatric population focus at this time.	Round 1

		View the NCMHI Vermont state profile for more information about Vermont's community health teams.			
Virginia	X	Under Virginia's Medallion 3.0 Managed Care contract, managed care organizations are required to implement at least one Medallion Care System Partnership (MCSP) within their provider network that addresses complex and chronic health conditions by identifying, monitoring, and assigning members with complex or chronic health conditions to a Health Care Home. All MCSPs are required target pediatric populations with the option to also target adults. In August 2018, Virginia will launch the Medallion 4.0 Managed Care Program, in which the state will maintain the MCSP requirement.			
Washington	-		Washington Health Home State Plan Amendment	Health Homes in Washington serve adult and pediatric Medicaid beneficiaries with one chronic condition and risk for a second. Care Coordinators develop Health Action Plans that include specific pediatric screenings on parenting and childhood behavioral problems.	Round 2
West Virginia			West Virginia Behavioral Health Home State Plan Amendment	No pediatric population focus at this time.	
			West Virginia Chronic Conditions Health Home State Plan Amendment	The West Virginia chronic conditions health home program serves individuals with prediabetes, diabetes, and/or obesity, who are at risk of anxiety and/or depression.	
Wisconsin			Wisconsin Health Home State Plan Amendment	No pediatric population focus at this time.	

Wyoming	X	Wyoming measures medical home providers on nine clinical quality measures including childhood immunization status and follow up care for children prescribed ADHD medication.			
-	-	*PCMH activity related to SIM grants is not included in this list.		†Federal rules stipulate that health home programs cannot exclude specific age ranges. While children may be eligible for all state health home programs, this list highlights state efforts that have a particular focus on pediatric populations.
